FOR YOUR OWN SAFETY, PLEASE READ THIS USER MANUAL CAREFULLY BEFORE POWERING OR INSTALLING YOUR Eminere Side! Save it for future reference.

This device has left our premises in absolutely perfect condition. In order to maintain this condition and to ensure safe operation, it is absolutely necessary for the user to follow the safety instructions and warnings written in this manual.

The manufacturer will not accept liability for any resulting damages caused by the non-observance of this manual or any unauthorized modification to the device.

Unauthorized modification will void warranty.

1. Safety instructions

DANGEROUS VOLTAGE CONSTITUTING A RISK OF ELECTRIC SHOCK IS PRESENT WITHIN THIS UNIT!

This fixture should be operated only from the type of power source indicated on the marking label. If you are not sure of the type of power supplied, consult your authorized distributor or local power company.

Always disconnect the fixture from AC power before cleaning, servicing or installing.

Make sure the data/power cable is not damaged by sharp edges. Check the fixture and the power cord from time to time.

Do not install the unit near an open flame.

During operation the housing becomes hot.

Refer servicing to qualified service personnel.

This fixture falls under protection class I. Therefore this fixture has to be connected to a mains socket outlet with a protective earthing connection.

Do not connect this fixture to a dimmer pack.

LED light emission. Risk of eye injury. Do not look into the beam from a short distance without suitable protective eyewear. Do not look at LEDs with magnifiers or similar optical instruments that may concentrate the light output.

The fixture was designed for outdoor use. This fixture must not be used for underwater installation.

When choosing the installation spot, please make sure that the fixture is not exposed to extreme heat or dust.

Avoid using the unit in locations subject to possible impacts.

The fixture body never must be covered with cloth or other materials when the fixture is under operation.

Only operate the fixture after having checked that the housing is firmly closed and all screws are tightly fastened.

The fixture becomes hot during operation. Allow the fixture to cool approximately 30 minutes prior to servicing or maintenance.

Operate the fixture only after having familiarized yourself with its functions. Do not permit operation by persons not qualified to operate the fixture. Most damages are the result of unprofessional operation!

Please consider that unauthorized modifications on the fixture are forbidden due to safety reasons!

Please use the original packaging if the fixture is to be transported.

If this device will be operated in any way different to the one described in this manual, the product may suffer damages and the warranty becomes void. Furthermore, any other operation may lead to dangers like short-circuit, burns, electric shock etc.

The product (covers and cables) must not be exposed to a high frequency electromagnetic field higher than 3V/m.

Immunity of the equipment is designed according to the standard EN 55035 Electromagnetic compatibility of multimedia equipment - Immunity requirements.

Emission of the equipment complies with the standard EN55032 Electromagnetic compatibility of multimedia equipment – Emission Requirements according to class B.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

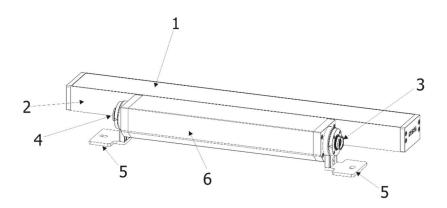

The [Device] wireless operation is safe and complies to RF Exposure requirements.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Warning for fixtures with Harsh Environment Finish (HEF):
Handle with care!
Avoid any damage to the painted surface.
Damaging the paint may result in corrosion and loss of warranty.

2. Fixture exterior view

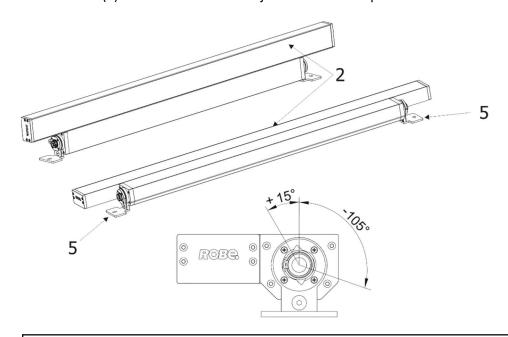

- 1. Transparent glass cover
- 2. LED module
- 3. Input connector
- 4. Output connector
- 5. Mounting brackets
- 6. Aluminium base

3. Installation

3.1 Mounting the fixture

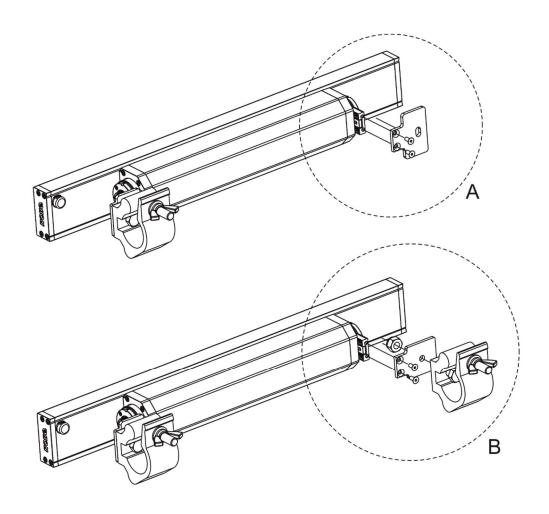

The Eminere Side can be arranged in any orientation on a flat, non-flammable surface by means of two mounting brackets (5), the LED module (2) can be tilted 120° to adjust desired beam position.

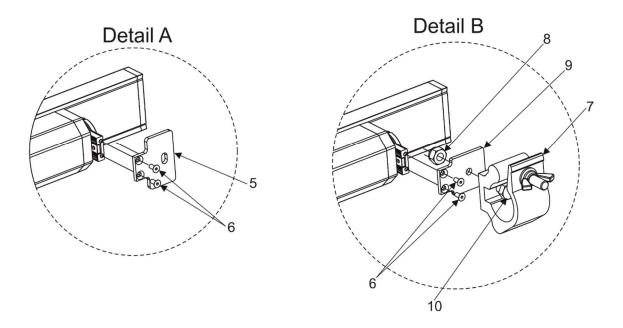

Ensure that the structure to which you are attaching the unit is secure.

3.2 C-clamps installation

- 1. Remove the mounting bracket (5) from fixture housing by unscrewing two screws (6).
- 2. Screw the new mounting bracket (9) to the fixture housing by means of two screws (6).
- 3. Screw the clamp (7) to the mounting bracket by means of the bolt M12x30 (10) with nuts M12 (8).

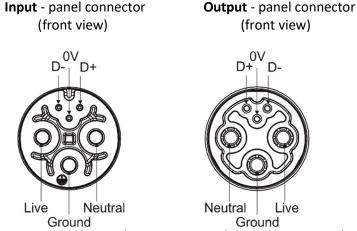

3.3 Connection to mains

The unit must be installed by a qualified electrician in accordance with all national and local electrical and construction codes and regulations.

This device falls under class one and must be grounded!

The Eminere Side is equipped with auto-switching power supply that automatically adjusts to any 50-60Hz AC power source from 120-277 Volts.

Wiring of input/output connectors:

Fixture's Amphenol connectors are dust and water protected according to IP 67 by mating with related Amphenol connectors.

They cannot stay disconnected outdoor.

The output panel connector at last fixture in the Eminere Side chain has to always be covered with the water-tight cap to keep declared IP rating.

The Eminere modules should be connected to the E-box which allows power supply of the Eminere modules and their control.

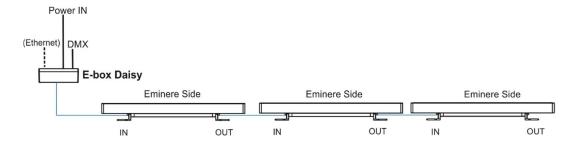

Do not connect (disconnect) Eminere Sides to the E-box or Booster box and each other when they are under voltage!

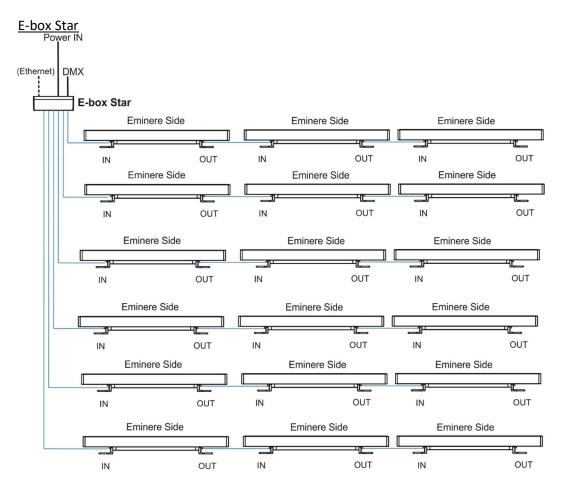

When you change any setting of the E-box, disconnect the E-box from power and connect it to power again to activate changes which you have made.

Examples of connection for various versions of the E-box.

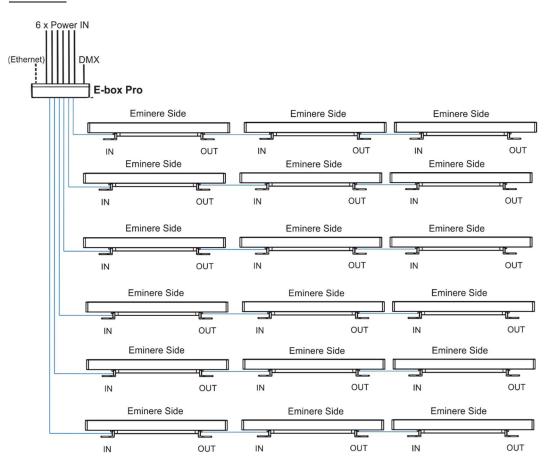

Please read the E-box user manual for more information about its setting and connection to Eminere modules. Needed cables are stated in the chapter "Technical information".

E-box Daisy

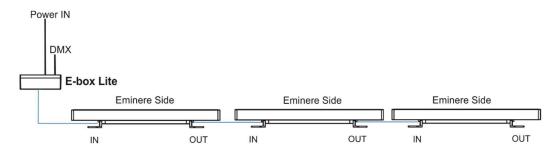

E-box Pro

E-box Lite

Number of connected Emineres Side to one E-box output depends on a cable length, power voltage, type of and E-box.

The tables below state max. theoretical number of Emineres connected to the one LED output of the E-box without Booster boxes. The following tables apply for the Standard mode of E-boxes.

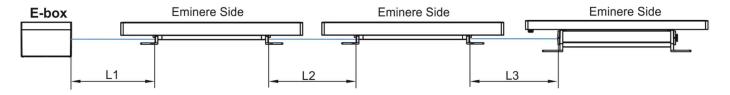

EMINERE 1	Voltage					
Cable length *	120V	190V	230V	277V		
10 m	66	104	127	152		
20 m	66	104	127	152		
30 m	46	104	127	152		
50 m	28	70	102	148		
70 m	20	50	73	106		
100 m	13	35	51	74		
200 m	7	17	25	37		

EMINERE 2	Voltage					
Cable length *	120V	190V	230V	277V		
10 m	36	56	69	83		
20 m	36	56	69	83		
30 m	24	56	69	83		
50 m	15	38	56	80		
70 m	10	27	40	57		
100 m	9	18	28	40		
200 m	3	9	16	20		

EMINERE 3	Voltage				
Cable length *	120V	190V	230V	277V	
10 m	25	40	48	59	
20 m	25	40	48	59	
30 m	17	40	48	59	
50 m	11	26	39	57	
70 m	7	19	28	40	
100 m	100 m 5		19	28	
200 m	2	6	10	14	

EMINERE 4	Voltage				
Cable length *	120V	190V	230V	277V	
10 m	19	31	37	45	
20 m	19	31	37	45	
30 m	14	31	37	45	
50 m	8	20	30	44	
70 m	5	15	21	35	
100 m	3	10	15	21	
200 m	1	4	7	11	

^{*} Cable length is a total cable length between E-box and last connected Eminere Side. Example: Total cable length=L1+L2+L3

Notice for the E-box Star: The tables above state max. total number of Emineres Side connected to 6 LED outputs of the E-box Star (or max. number of Emineres Side connected to one output if the rest of outputs is not connected). The E-box Star has only one power input!

The table below states max. number of Emineres Side connected to the one LED output of the E-box using Booster boxes (which compensate a voltage drop) regardless voltage and cable length.

3.4 The Booster box

To compensate a voltage drop in large installation, the Booster boxes have to be connected in the chain of Emineres Side at every LED output of the E-box.

The following tables give numbers of Emineres Side after which the Booster box has to be installed in the chain of Emineres Side (at one LED output of the E-box). The following tables apply for the Standard mode of E-boxes.

EMINERE 1	Max. number of Emineres 1= 152						
		Voltage					
Cable length	120V	190V	230V	277V			
10 m	66,132	104	127	-			
20 m	66,132	104	127	-			
30 m	46,92,138	104	127	-			
50 m	28,56,84,112,140	70,140	102	148			
70 m	20,40,60,80,100,120,140	50,100,150	73,146	106			
100 m	13,26,39,52,65,78,91,104, 117,130,143	35,70,105,140	51,102	74,148			
200 m	7,14,21,28,35,42,49,56,63, 70,77,84,91,98,105,112, 119,126,133,140,147	17,34,51,68,85, 102,119,136	25,50,75,100,1 25,150	37,74,111, 148			

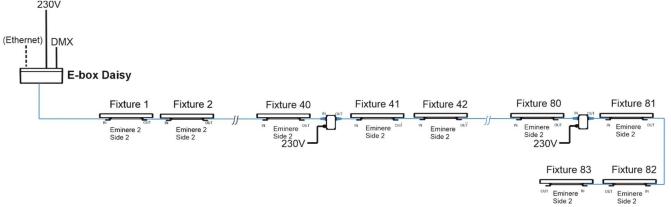

EMINERE 2	Max. number of Emineres 2= 83							
		Voltage						
Cable length	120V	190V	230V	277V				
10 m	36,72	56	69	-				
20 m	36,72	56	69	-				
30 m	24,48,72	56	69	-				
50 m	15,30,45,60,75	38,76	56	80				
70 m	10,20,30,40,50,60,70,80	27,54,81	40,80	57				
100 m	9,18,27,36,45,56,63,72,81	18,36,54,72	28,56	40,80				
200 m	3,6,9,12,15,18,21,24,27,30, 33,36,3942,45,48,51,54,57, 60,63,66,69,72,75,78,81	9,18,27,36,43,54 ,63,72,81	16,32,48,64,80	20,40,60,80				

EMINERE 3	Max. number of Emineres 3= 59						
		Voltage	_				
Cable length	120V	190V	230V	277V			
10 m	25,50	40	48	-			
20 m	25,50	40	48	-			
30 m	17,34,51	40	48	-			
50 m	11,22,33,44,55	26,52	39	57			
70 m	7,14,21,28,35,42,49,56	19,38,57	28,56	40			
100 m	5,10,15,20,25,30,35,40,45, 50,55	13,26,39,52	19,38,57	28,56			
200 m	2,4,6,8,10,12,14,16,18,20, 22,24,26,28,30,32,34,36,38,40,42,44,46,48,50,52,54, 56,58	6,12,18,24,30,36 ,42,48,54	10,20,30,40,50	14,28,42,56			

EMINERE 4	Max. number of Emineres 4= 45								
		Voltage							
Cable length	120V	190V	230V	277V					
10 m	19,38	31	37	-					
20 m	19,38	31	37	-					
30 m	14,28,42	31	37	-					
50 m	8,16,24,32,40	20,40	30	44					
70 m	5,10,15,20,25,30,35,40	15,30	21,42	35					
100 m	3,6,9,12,15,18,21,24,27,30, 33,36,39,42	10,20,30	15,30	21,42					
200 m	1,2,3,4,5,642,43,44	4,8,12,16,20,24, 28,32,36,40,44	7,14,21,28,35, 42	11,22,33,44					

Example: E-box Daisy, Power supply= 230V, Cable length=70m, fixture=Eminere Side 2

The Booster box has to be connected after every 40th Eminere Side 2 (fixture 40 and fixture 80) from 83 fixtures. 230V

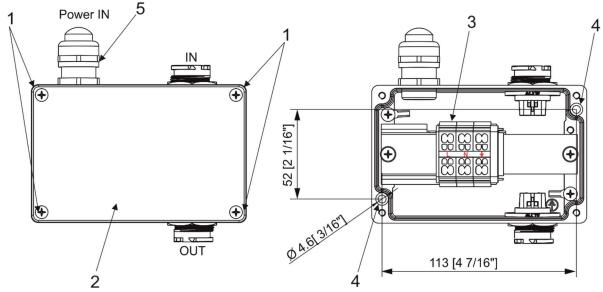

3.5 The Booster box installation

ALWAYS DISCONNECT THE EMINERES SIDE FROM MAINS BEFORE CONNECTING/DISCONNECTING THE BOOSTER BOX.

The Booster box falls under protection class I. Therefore, every Booster box has to be connected to a mains socket outlet with a protective earthing connection.

- 1.Unscrew the four screws (1) from the cover (2) on the Booster box to get access to the terminal block (3) and two mounting holes of diameter of 4.6 mm (4).
- 2. Screw the Booster box on a non-flammable flat surface and connect cables.

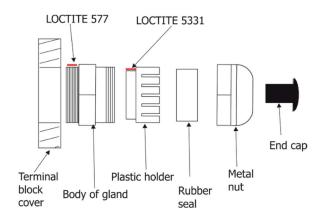

The Cable gland M20x1.5 for Power IN (5) is intended for a cable of a diameter of 7-13mm. Remove the end cap from the cable gland before passing the cable.

Power connection

	L	N	(earth)
Core (EU)	Braun	Blue	Green/yellow
Core (US)	Black	White	Green

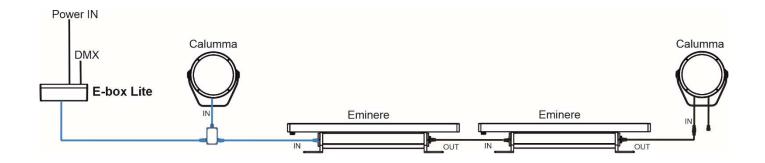

We recommend to apply an adequate layer of the paste LOCTITE 5331 on the plastic holder of the cable gland before inserting it into the body of the gland and an adequate layer of the paste LOCTITE 577 on the thread of the gland body.

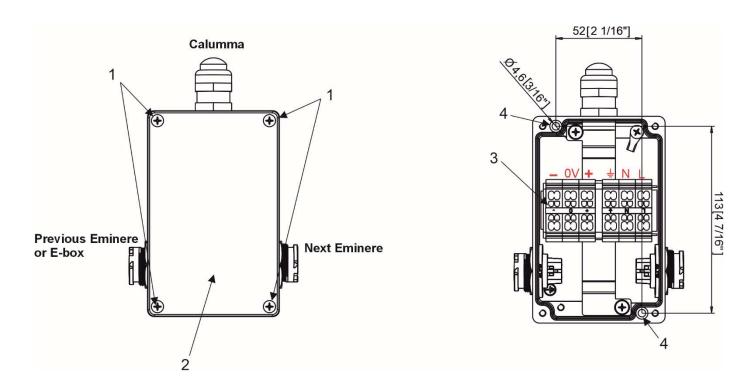

3. Screw the cover (2) back on the Booster box.

3.6 Junction box for connecting of Calumma

This junction box with panel connectors allows you to connect the Calumma (Calumma S/M/L/XL) without IN/OUT connectors to the line of Emineres (and Calummas with IN/OUT connectors).

Mounting and connection of the Junction box with panel connectors.

The junction box box falls under protection class I. Therefore, every junction box has to be connected to a mains socket outlet with a protective earthing connection.

- 1.Unscrew the four screws (1) from the cover (2) on the junction box to get access to the terminal block (3) and two mounting holes of diameter of 4.6 mm (4).
- 2. Screw the junction box on a non-flammable flat surface.
- 3. Connect cable from the Calumma to the terminal block.

CE version of the junction box -the Calumma cable gland M20 \times 1.5 with a standard seal serves for a cable of diameter of 6-12mm

US version of the junction box -the Calumma cable gland M20 \times 1.5 with a standard seal serves for a cable of diameter of 7-13mm

Remove the end cap from the cable gland before passing the cable from Calumma.

We recommend to apply an adequate layer of the paste LOCTITE 5331 on the plastic holder of the cable gland M20x1.5 before inserting it into the body of the gland as described in the previous chapter " The Booster box installation".

3.7 Jumper cable assembling

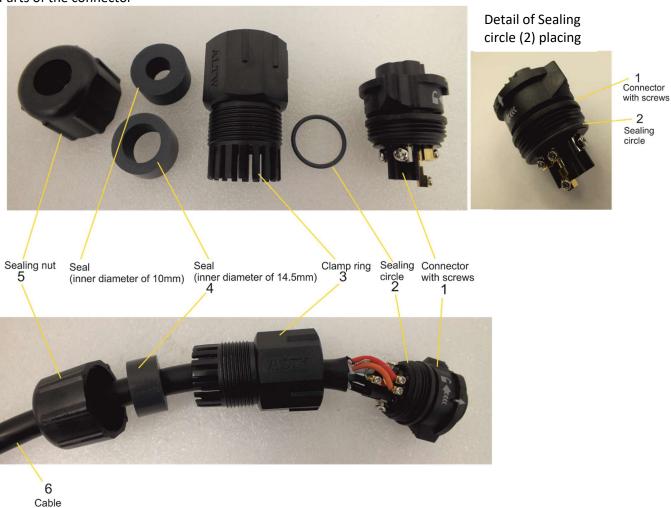

1. Dismantle the connector and slide its parts onto the cable (6).

Use the seal with inner diameter of 14.5 mm for the Anolis cable (P/N 13053138 or P/N 13053139).

The seal with inner diameter of 14.5 mm serves for cable of diameter 10-14.5 mm.

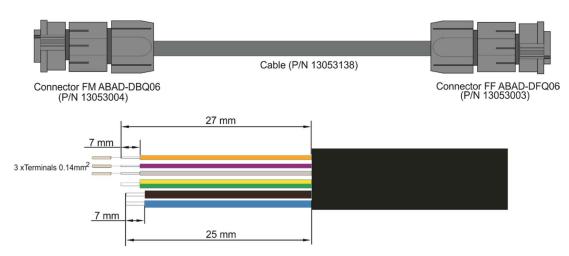

The seal with inner diameter of 10 mm serves for cable of diameter 8-10mm.

Parts of the connector

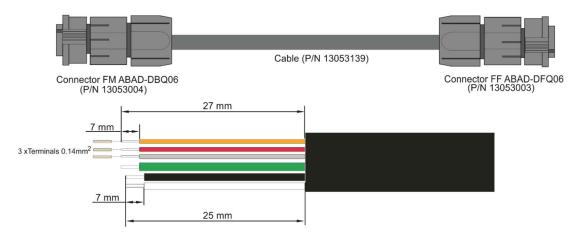

- 2. Put the seiling circle (2) on the connector with screws (1).
- 3. Remove insulation from the cable (6) and from individual wires and fasten three terminals on data wires.

CE version

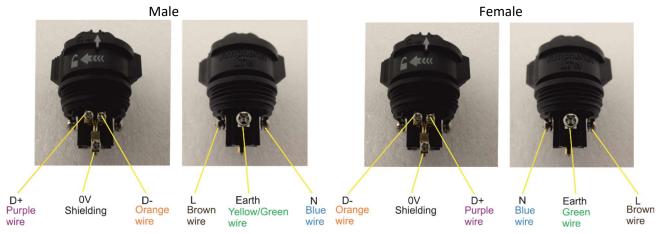

US version

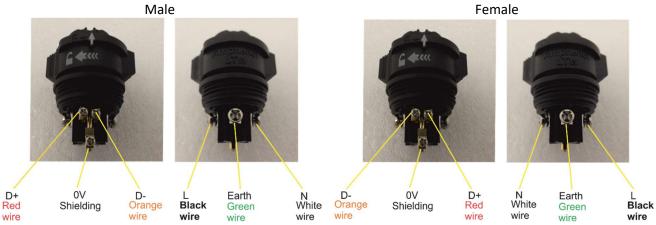

4. Put parts of the connector on the cable (6) and connect wires to the connector. First connect power wires (L,N, Earth) and after that data wires (D+, D-, OV). Avoid excessive torsion of data wires!

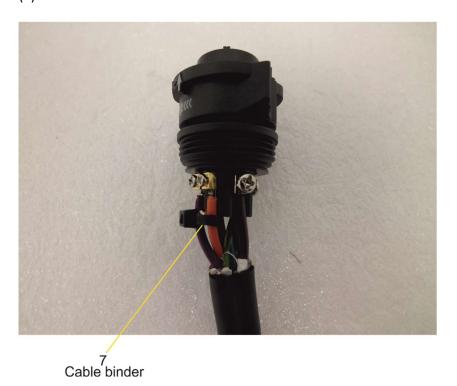

CE version

US version

5. After connecting wires to the connector, tighten the three data wires (D+,D-, 0V) by means of the cable binder (7).

- 6. Screw the clamp ring (3) to the connector (1), insert the seal (4) to the clamp ring (3) and tighten the sealing nut (5) enough. During the steps DO NOT TWIST the cable (6).
- 7. Use the same procedure to assemble the connector on the second end of the cable.

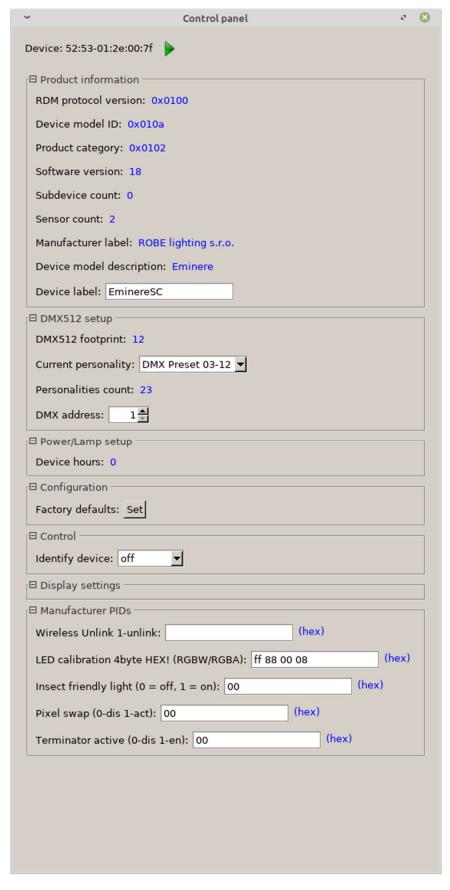

IMPORTANT

Do not bend the cable near to the connector, minimum distance for bending is 50mm.

3.8 Example of Control panel in RDM manager

The software RDM manager is available on the ROBE website (https://www.robe.cz/support), product RUNIT WTX.

Green arrow saves changes made in the Control panel to the Eminere Side.

Manufacturer PIDs

<u>Wireless unlink</u> - the item allows you to unlink the Eminere Side from a DMX transmitter (Wireless DMX version of the Eminere Side only).

<u>LED calibration 4byte HEX! (RGBW/RGBA)</u> - the item shows 4 bytes of calibration values for calibrated white colours of RGBW(RGBA) Eminere Side.

E.g.

LED calibration 4byte HEX! (RGBW/RGBA): ff 88 00 08 (hex)

CTC channel has to be set to some calibrated white colour (21 DMX-1800K, 66 DMX-2700K, 91 DMX-3200K, 141 DMX-4200K, 211 DMX-5600K, 255 DMX-6500K) otherwise the item shows values "ff ff ff" (and calibration values cannot be saved to the Eminere Side).

Warning!

Changing and saving values in this item will effect calibrated white colour(s) of the Eminere .

<u>Insect friendly light</u> - the item effects RGBA Eminere Side only. If the item is on, blue colour is not used in calibrated white colours. This modification of white lights results in a smaller attraction of white light for insects (mosquitos, moths..). The function is also available from DMX chart (channel Special Function, range 7-10 DMX).

Pixel Swap – the item allows you to swap the pixel order (for Eminere Side 2/3/4 only).

<u>Terminator active</u> - the item allows you to terminate line of Emineres Side at last Eminere Side.

4. Software update

Software update of Eminere has to be done by means of the software ROBE Uploader running on PC. The ROBE Uploader is a software for automatized software update of ROBE fixtures. The ROBE Uploader switches Emineres to the update mode automatically.

Please see https://www.robe.cz/robe-uploader/ for more information.

DMX or Ethernet connection via E-box

If the option **Standard** is selected from the menu **E-box mode** and LED modules are connected in series, the E-box will be updated including connected Eminere modules. You have to use the file <u>EminereEbox.lib</u> in the ROBE Uploader for this operating mode.

If the option **Pass-Thr** is selected from the menu **E-box mode** and LED modules are connected in series, you have to do the following steps to update Emineres including the E-box:

- 1. Set the E-box to the Standard mode and switch it off/on. Only E-box will be shown in the ROBE Uploader. You have to use the file EminereEbox.lib in the ROBE Uploader for software update of the E-box and connected LED modules.
- 2. After updating, set the E-box to the Pass-Thorough mode and switch it off/on.

For more information about updating please see the E-box Lite/Daisy/Star user manual.

5. Technical specifications

Power supply

- Electronic auto-ranging
- Input voltage: 120 277V AC, 50-60 Hz
- Power consumption:

Eminere Side 1: 25W Eminere Side 2: 45W Eminere Side 3: 65W Eminere Side 4: 85W

• Inrush current:

Eminere Side 1: <70A/250µs Eminere Side 2: <70A/250µs Eminere Side 3: <100A/200µs Eminere Side 4: <100A/200µs

Optic

• Light source:

Terminal KE 106, diameter 0.14mm² (P/N 13053403) Waterproof Cover Cap FM ZAHB-0006 (P/N 17031173) Field Installable Connector FF (P/N 13053003) Field Installable Connector FM (P/N 13053004) C-clamp adaptors for Eminere (P/N 10980860)

E-boxes:

E-box Daisy (P/N 10063655) E-box Daisy/W (P/N 10063638) E-box Lite (P/N 10063657) E-box Lite/W (P/N 10063653) E-box Star (P/N 10063656) E-box Star/W (P/N 10063644)

Booster box (P/N 10063712)

Shield for Eminere 1 RAL9011 (P/N 10980488) Shield for Eminere 2 RAL9011 (P/N 10980489) Shield for Eminere 3 RAL9011 (P/N 10980490) Shield for Eminere 4 RAL9011 (P/N 10980491)

Junction Box w/Panel Connector CE RAL9011 (P/N 10981268)
Junction Box w/Panel Connector US RAL9011 (P/N 10981269)
Junction Box w/Panel Connector CE RAL9007 (P/N 10981295)
Junction Box w/Panel Connector CE RAL8004 cus (P/N 10981326)
Junction Box w/Panel Connector US RAL1013 (P/N 10981358)

6. Cleaning and maintenance

DANGER! Disconnect from the mains before starting any maintenance or cleaning work

Rinse off loose dirt with low pressure water spray. Wash the housing with a soft brush or sponge and a mild, non-abrasive washing detergent. Rinse it.

Maintenance and service operations are only to be carried out by a qualified person.

Should you need any spare parts, please use ROBE OEM parts.

6.1 Disposing of the product

To preserve the environment please dispose or recycle this product at the end of its life according to the local regulations and codes.

7. ChangeLog

This section summarizes changes in the user manual.

Version of the manual	Date of issue	Description of changes
1.1	10/07/2020	Voltage range changed
1.2	23/07/2021	Optional accessories changed
1.3	19/08/2021	Jumber cables changed in Optional accessories
1.4	19/10/2021	Technical specifications changed
1.5	26/11/2021	Optional accessories changed
1.6	20/12/2021	Jumper cable mounting added
1.7	06/01/2022	Jumper cable mounting changed
1.8	23/02/2022	Sealing circle added to jumper cable mounting
1.9	19/05/2022	QR code added
2.0	10/01/2023	Software update description
2.1	10/02/2023	DMX chart ver.3.2
2.2	05/09/2023	C-clamp installation added
2.3	13/09/2023	Jumper and leader cables numbers changed
2.4	31/01/2024	Control panel of RDM manager added, DMX chart ver. 3.3
2.5	13/09/2024	Numbers of Emineres in Standard Mode changed
2.6	24/10/2025	Junction box with panel connectors added
